

The Pavilion

A permanent getaway

16' x 24'

Many of us have had a special day spoiled by rain. Even if we can erect a tent to fend off a possible deluge, that high-maintenance option to preserve a garden party tends to fall short.

A pavilion can help you enjoy the outdoor life throughout the warm seasons of the year, without having to check the weather forecast each day. This

attractive addition to your grounds will always be there for future birthday parties and family celebrations – along with countless comfortable summer afternoons in the shade, overlooking a favorite view.

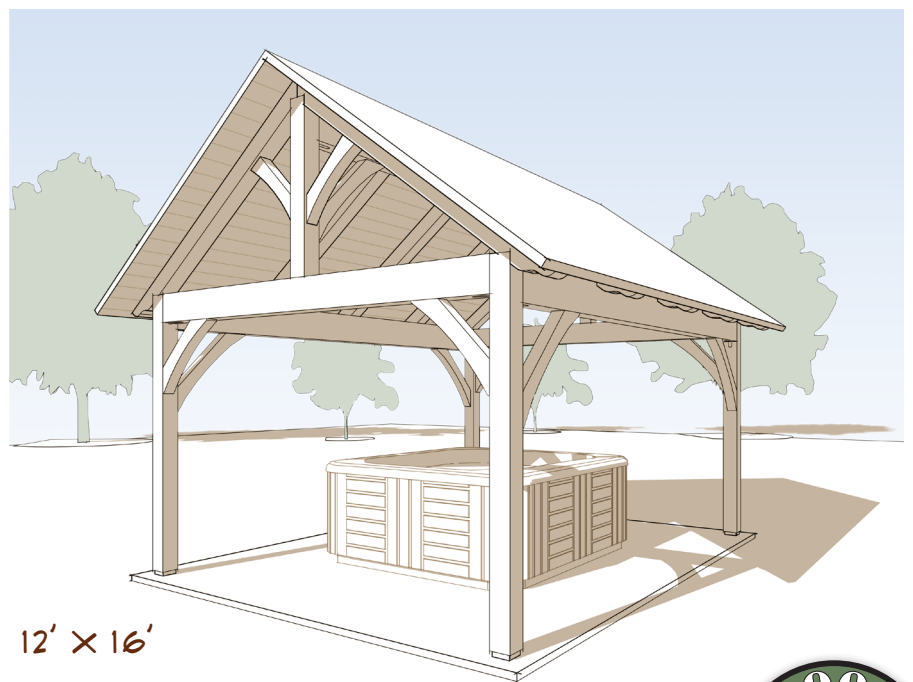

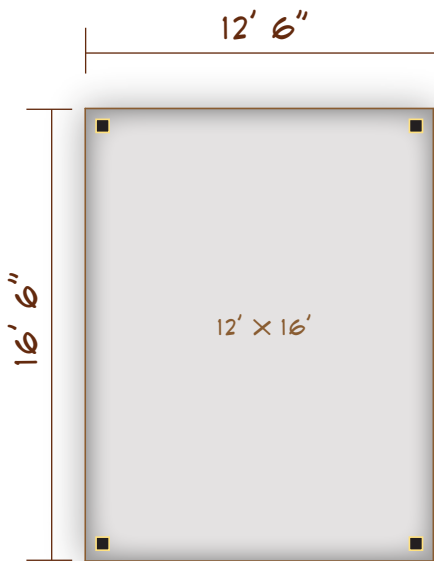

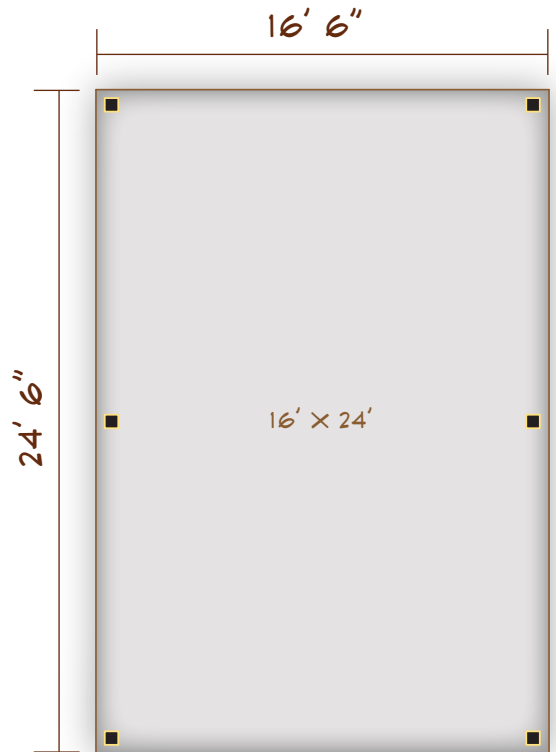

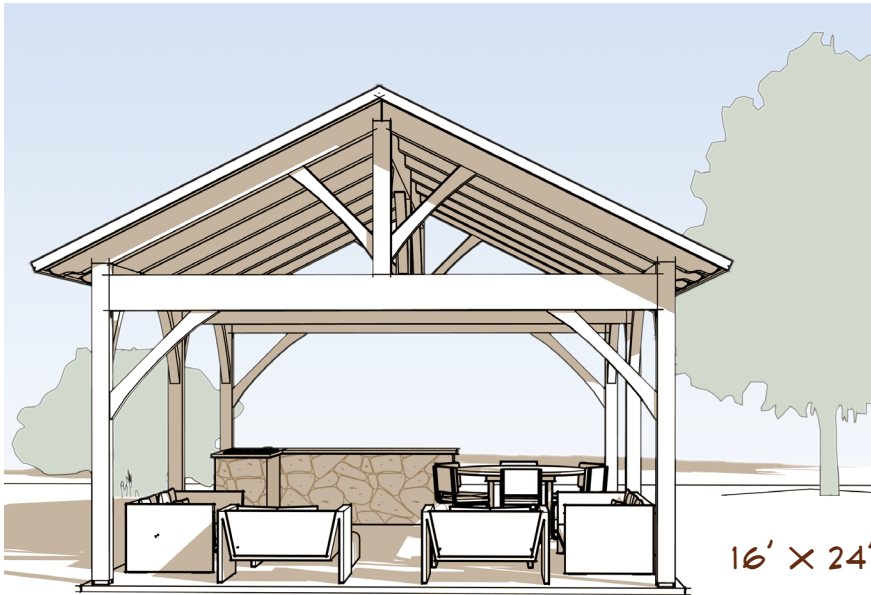

It can also be used for a specialized purpose – as an outdoor kitchen or bar, as a carpark, or, with some screening, as a relaxing refuge from pesky bugs.

The Pavilion

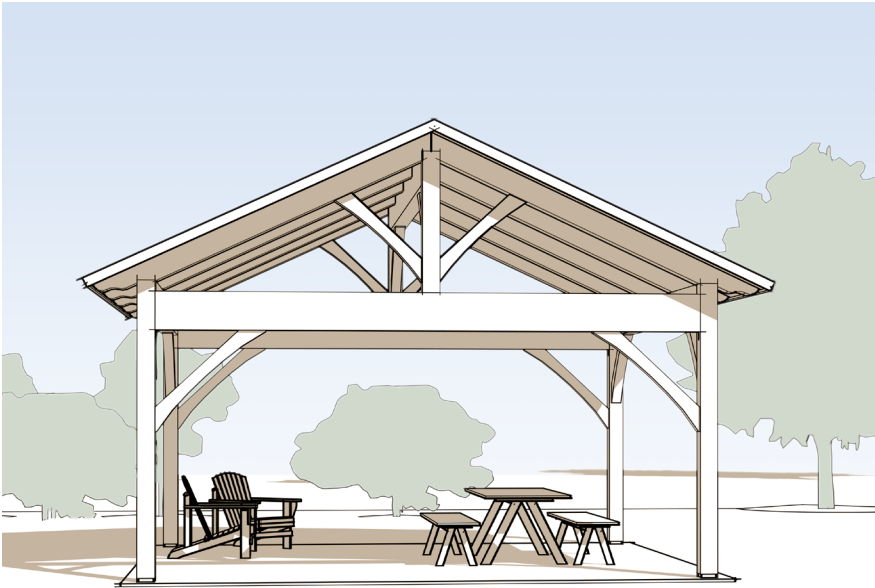

Brooks Post & Beam offers pavilion kits in a number of pre-drawn sizes, but you can also request a different size that works for your site and planned uses. Since it's made with a Brooks frame, there's always the option to close in the pavilion with walls any time in the future.
