

Lincoln Garage

Versatility itself

FRONT CORNER VIEW

This versatile building is ideal for a garage, shop, stable, or even a studio or office. The Lincoln is a 1-story barn with loft storage space above. It includes a 10-foot-wide lean-to shed roof to shelter vehicles, vehicle, equipment or livestock.

Timber frame barns are completely at home in a rural environment. They've been a part of the New England geography for centuries, after all! Brooks Post & Beam barns and garages are made primarily of native New Hampshire lumber; the walls can be composed of a simple, affordable layer of shiplap boards, just as they were 100 years ago!

Lincoln Garage

And while any timber frame structure will allow for flexibility, a barn can be even more versatile and responsive over time as your needs change.

Just move your partitions if you decide you want to turn your horse stalls into a parking area, apartment or art studio!
